- As a Guest, I want to be able to view articles on the homepage so that I can read without making or logging in to the account.
  - Select group of articles for main page
  - Display articles, including to those not registered
  - Assignee: Derek

- As a Reader, I would like to be able to create an account so that I can access content reserved for registered users.
  - Create Registration button available from Main page
  - Create Registration page
  - After passing validation parameters, add user information to database
  - Assignee: Jazlyn

- As a Reader, I would like to be able to post comments on an article so that I can share my opinion with other readers as well as the author.
  - Login as reader
  - Click on "Read More" button
  - Type comment into the text box
  - Click "Comment" button
  - Assignee: Jack

- As an Author, I want to be able to post articles to the site so that people can read them.
  - Login as author
  - Click the 'Add Article' Button
  - Fill in the information
  - Click 'submit' button
  - Assignee: Derek

- As an Author, I want to be able to view the articles I have posted in the past so that I can easily see feedback I've received from the readers.
  - Login as author
  - Click the menu dropdown
  - Click 'Article List'
  - Assignee: Derek

- As an Admin, I would like to be able to create Author accounts so that new employees can gain full access to the Author view of the website.
  - Login as an admin
  - Click the menu dropdown
  - Click 'User List'
  - Click the 'Add User +' button
  - Fill out the relevant information
  - Click 'submit'
  - Assignee: Jazlyn

- As an Admin, I would like to be able to edit user accounts so that user information can be updated
  - Login as an admin
  - Click the menu dropdown
  - Click 'User List'
  - Click the User to be edited and the Edit button
  - Fill out the relevant information
  - Click 'submit'
  - Assignee: Jazlyn

- Validation
  - As an Admin, I would like to be confident that each of my users has a valid email so that my site has an easier time managing its users.
    - Validation makes sure each user has a valid email address
  - Assignee: Jack
- Security
  - Token set after login
  - As a user I want a login page
  - Public urls don't need any security on them
  - Be able to store permissions, users, roles
  - Assignee: Jack
